Research Interests

International trade; geoeconomics, macroeconomics; fragmentation and sanctions; firm-level and aggregate adjustment to trade shocks; quantitative trade models; financial econometrics.

Doctoral Research

My doctoral research studies firm- and aggregate-level economic adjustment to geoeconomic fragmentation, combining micro-empirical work on firm responses to trade and sanctions shocks with quantitative trade modelling of aggregate welfare consequences. The agenda is closely related to the ER-GEO grant project I am a part of (Economic Resilience in a Geo-economically Fragmented Global Economy; PI: Povilas Lastauskas).

Education

PhD in Economics 09/2026 – end of PhD

Sciences Po, France. Supervisor: Isabelle Mejean (Sciences Po).

PhD in Economics

10/2025 – present

Vilnius University, Lithuania. Supervisor: Povilas Lastauskas (IMF Research Department / Vilnius University).

Summer School, Paris School of Economics

06/2026

Paris School of Economics, France.

International Trade and Macroeconomics (two programmes; 6 ECTS total)

Visiting PhD Student, Tinbergen Institute

10/2025 – 01/2026

University of Amsterdam, the Netherlands.

MPhil/PhD coursework: Microeconomics II (8/10), Macroeconomics I (8/10), Advanced Topics in Macroeconomics I (8.5/10).

MSc Econometrics, Financial Econometrics track — with Honours

09/2024 – 08/2025

University of Amsterdam, the Netherlands. 75 ECTS (60 required).

One of two students in the cohort to complete the Honours programme; only student in the Financial Econometrics track.

BSc Quantitative Economics — Cum Laude

09/2021 – 06/2024

Vilnius University, Lithuania. GPA 9.36/10; 187 ECTS. Best Bachelor Thesis Award, Bank of Lithuania.

Erasmus+ Exchange

09/2023 – 01/2024

Université Paris 1 Panthéon-Sorbonne, France. Coursework: Economic Growth, International Monetary Economics, Microeconomics: Uncertainty and Information.

Research Positions

Research Assistant, ER-GEO project

12/2025 – present

Vilnius University. Firm-level and aggregate analysis of economic adjustment to geoeconomic fragmentation; literature review and empirical data infrastructure for transaction-level customs and firm balance-sheet data.

Research Assistant (Traineeship)

07/2024 – 08/2024

Bank of Lithuania. Bond-spread analysis of the Baltic countries with Soroosh Soofi-Siavash and Junghum Park: data construction, variable selection, and empirical analysis.

Research Assistant (Internship)

06/2023 – 07/2023

Bank of Lithuania. *Misallocation of Global Debt*, with Swapnil Singh: literature review, data collection, exploratory analysis.

Research Assistant (Internship)

01/2023 – 02/2023

Bank of Lithuania. *State support in Lithuania during the COVID-19 pandemic*, with Mustapha Douch: literature review, data exploration and visualisation.

Teaching

Teaching Assistant, Statistical Theory II (BSc Quantitative Economics)

02/2026 – present

Vilnius University. Designed and delivered the full lab programme (slides, exercise sheets, R code, solutions) covering Bayesian conjugate inference, continuous distributions, and linear regression.

Teaching Assistant (BSc Econometrics)

03/2025 – 07/2025

University of Amsterdam. Econometrics I (Dr. A. Juodis), Econometrics II (Dr. K.J. van Garderen), Introduction to Data Science (Dr. D. Linders): in-class problem sessions and grading.

Private Mathematics Tutor (Self-employed)

05/2022 – 05/2025

Alfa Klasė, Vilnius. Approximately 1,000 hours of one-on-one secondary-school mathematics tuition, including state-exam preparation.

Selected Research Outputs

BSc Thesis (2024). *Testing for Non-Linear Trade and Financial Linkages: Evidence from Panel Data.* Supervisor: Guillermo Hausmann Guil. Grade 10/10; **Best Bachelor Thesis Award, Bank of Lithuania.** [\[full text\]](#)

MSc Thesis (2025). *Do Crypto Volatility Parameters Behave Like Stocks? Evidence from Univariate GARCH-family Models.* Supervisor: Simon Trimborn.

MSc Honours Research Project (2025). Policy evaluation of flood-protection schemes.

CEFER Challenge — Bank of Lithuania research competition.

- *2025 — team lead and finalist.* AI effects on the macroeconomy via the financial-system channel.
- *2024 — finalist.* Synthetic Difference-in-Differences estimation of Brexit's effect on Euro-area labour flows.
- *2023 — finalist.* Inflation heterogeneity in the Euro Area through financial models.

Academic Service

Member of the admissions committee and member of the thesis defence committee, BSc Quantitative Economics, Vilnius University (2026).

Awards and Scholarships

- Best Bachelor Thesis Award, Bank of Lithuania (2024).
- Nasdaq Vilnius Scholarship (2023) — merit-based, financial technology focus.

Languages

Lithuanian (native); English (C2).

Skills and Standardised Tests

Programming: R, Python, MATLAB, Stata, Julia, Dynare, LaTeX. **Tools:** Git, Zotero.

Standardised Tests: GRE 162Q / 153V / 5.0AW (2024); TOEFL iBT 116/120.
